Abstract: Ideal and belief education is an important subject of ideological and political education. As a new force for the development of the new era, college students represent the future development direction of China. Their ideal and belief education is not only related to the growth and development of individuals, but also to the future direction of the country. It is the proper meaning of ideological and political education to carry out the ideal and belief education of college students, and it is also an important driving force to promote the progress and development of the country.

Keywords: Ideals and Beliefs; College Education; Path

1. The Value Implication of College Students' Ideal and Belief Education

College Students' ideal and belief education is an important starting point for mastering the leadership of College Students' ideological work. It is of great significance to carry out ideal and belief education for college students to promote the progress and development of the country. At this stage, a variety of ideological trends are coming one after another. Influenced by the diversity of ideology, college students' Outlook on life, world outlook and values will inevitably be affected. There is a phenomenon that a small number of college students lack the spirit of hard work and teamwork ability, and excessively pursue personal value. Therefore, it is particularly critical to carry out ideal and belief education among college students. With a correct outlook on life, world outlook and values, students can consciously and actively participate in the construction and reform of the country, and look at world changes, social trends and problems that may be faced in reality from a correct perspective. Firm ideals and beliefs enable people to make correct judgments and choices in the face of complex situations and multiple ideological trends, and consciously

fight against wrong views and forces. To firmly grasp the ideological work, we must do a good job in the education of ideals and beliefs. the education of College Students' ideals and beliefs is an important part of mastering the ideological initiative of the young generation. Widely carrying out ideal and belief education among college students is an important way to enhance the ideological leadership of college students. Only the discourse expression with both theoretical connotation and practical implication can provide theoretical and practical guidance for college students' ideal and belief education with its rich connotation and broad extension.

To carry out the education of College Students' ideals and beliefs is to cultivate college students to consciously shoulder the mission. Nowadays, the international situation is complicated, thinking is diversified and diversified, and college students' access to information is extensive and diverse under the background of the network era. Therefore, it is necessary for us to integrate more positive factors into the ideal and belief education, and we should also carry out education on the standpoint and methods of looking at hot issues and identifying the views of all parties. Leading college students to establish correct ideals and beliefs is conducive to improving the ability of college students to identify wrong ideas, continuously enhancing their sense of national, national and social identity, and consciously shouldering the mission of the great rejuvenation of the Chinese nation. the idea is the guide of action. Only by producing continuous psychological identity in thought can the college students' group strengthen their ideals and beliefs and avoid falling into a wrong path; Only in this way can we cultivate the positive psychological state of college students who are not alarmed and arrogant, and consciously resist the erosion of decadent ideas; Only in this way can college students be guided to have a deep understanding of the general trend of national development and take

the initiative to fight against wrong remarks and behaviors; Only in this way can the college students be encouraged to consciously devote themselves to the construction of the motherland, refuse to "lie flat" and "rot", and spend their regretless youth in the struggle.

Carrying out the ideal and belief education of college students is the inherent requirement to enhance the national identity, self-confidence and pride of college students. the lofty ideals and beliefs are the prerequisites for the Chinese people to form a sense of national and national identity, self-confidence and pride. College students should have lofty ideals and beliefs to guide the real life, so as to form a correct outlook on life, world outlook and values. Ideal and belief education is to internalize the correct values in the heart and externalize them in the form through a series of educational activities, cultural edification, public opinion propaganda, and practical activities. Only through the education of ideals and beliefs can the concept be deeply rooted in the hearts of the people and rooted in the land of China, so as to continuously stimulate the enthusiasm of the student group for national rejuvenation and the construction of the motherland, increase the ambition, strength and confidence of young students, and thus continue to enhance the confidence of the whole society in realizing the great rejuvenation of the Chinese nation. At the same time, only when college students consciously integrate their personal ideals into the mission of serving the country and devote themselves to the great self, can the ideal and belief education be effective.

2. The Realistic Way of College Students' Ideal and Belief Education

The development of ideal and belief education should be carried out in combination with the actual situation of the country. It is a complex systematic project to carry out the ideal and belief education of college students, which is the common responsibility of the whole society. Therefore, the development of college students' ideal and belief education should gather the strength of all people, need the joint efforts of the whole society, play a strong force. In the education of ideals and beliefs, we should give full play to the role of inside and outside the school, fully tap advanced cultural resources, drive people, inspire people and unite people

with the powerful atmosphere of main melody and positive energy, combine explicit education with implicit education, combine with Chinese excellent traditional culture, and combine with China's specific reality. We should not only pay attention to the top-level design, but also pay attention to the operability of reality, so that the education of ideals and beliefs runs through the whole process of individual development, and promotes the free and comprehensive development of college students in the spiritual realm of college students. At the same time, we should build a bridge of communication and dialogue between educators and educatees, create a good social fashion in the whole society, and comprehensively improve the modernization level of China's governance system.

At the social level, the government and other relevant departments should vigorously cultivate and carry forward the theme and positive energy, apply positive guidance to all aspects of daily life, pay attention to the publicity and education of advanced culture, set an example in the whole society, and make advanced culture the common belief of college students and the common pursuit of college students. On the one hand, we should guide young students to bear in mind their mission and take the long march of the new era with lofty ideals and beliefs. On the other hand, we should use the deeds of advanced figures to publicize the people, fully tap the advanced cultural resources, make extensive use of the deeds of exemplary figures, and enhance people's understanding of advanced culture, so as to establish harmonious interpersonal and social relations. At the same time, the government and other relevant departments can strengthen the construction of statues, sculptures and museums of great significance, give full play to its powerful real scene field effect, and hold relevant theme activities at important time nodes and important occasions, so as to improve the attention of more social groups to the education of ideals and beliefs.

At the school level, to carry out ideal and belief education for college students, on the one hand, we should use Marxist scientific theory to form correct values, arm our minds with scientific theory, improve people's aesthetic interest with high-quality literary and artistic works, bring rich development of the moving spiritual world with the prosperity and

progress of cultural undertakings, and guide college students to be used to analyzing and solving problems with Marxist theory, views and methodology. On the other hand, to enhance ideals and beliefs, we can not only carry out the education of advanced culture for college students, but also deepen the education of ideals and beliefs in the inheritance of the traditional and excellent culture of the Chinese nation. Culture has historical inheritance, and the education of ideals and beliefs in the new era cannot be separated from the previous excellent Chinese civilization heritage. The excellent traditional culture of the Chinese nation embodies the wisdom of the Chinese people for thousands of years, represents the common spiritual beliefs and ideal pursuit of countless Chinese people, and has a profound accumulation, which provides a rich theoretical fertile soil for the ideal and belief education of contemporary college students.

Only by making good use of ideal and belief education can we cultivate talents with both ability and political integrity, and can we cultivate high-quality talents who can be used widely. Colleges and universities can rely on the campus resource landscape, pay attention to the combination of explicit education and implicit education in the daily management education of students, and enhance the function of ideal and faith to cultivate the ideological realm of college students by establishing visual resources such as rational belief education bulletin board and supporting landscape, and holding activities loved by students such as speech contests, lecture contests, and campus performance activities. At the same time, we can also strengthen publicity, innovate publicity forms and create a strong atmosphere. For example, hold the exhibition of the deeds of advanced figures, shoot the sitcom of the deeds of advanced figures and the micro party lessons of outstanding representatives, draw the ideal and belief education propaganda wall, expand the resources of the reading room, and guide the majority of students to consciously guide their personal growth and success with lofty ideals and beliefs. At the same time, college teachers, as the main force of educating people, should play a key role in cultivating morality. First, pay attention to the development of relevant courses, strengthen the mining of ideal and belief education resources, and systematically

integrate a set of bibliographic materials for students to learn, so as to enrich the construction of College Students' ideal and belief course group. Second, we should strengthen the collection and collation of the advanced deeds of outstanding figures, give full play to the example power of outstanding figures, especially pay attention to the excavation of outstanding tasks and advanced deeds around students, give full play to the power of peers, integrate the ideal and belief education into the teaching of professional courses, and cultivate college students' ideal and belief education with vivid cases. Third, make good use of modern information technologies such as AR and VR, establish a virtual simulation teaching experiment center, make full use of the real scene to enable ideal and belief education, restore the real scene with the character story as the carrier, and let students feel the spiritual style of advanced characters on the spot.

At the individual level, college students should also actively and consciously accept the education of ideals and beliefs. Guided by Marxism, they should consciously accept the education of ideals and beliefs, continue the gene of Chinese excellent traditional culture, encourage themselves to study hard, keep improving, and make selfless contributions with the deeds of outstanding people, adhere to the mass viewpoint and mass line, and actively participate in the construction of the motherland. In addition, students can also make full use of summer vacation and other vacations to visit their hometown, explore the outstanding deeds of people around them, condense their personal characteristics, widely publicize advanced figures and their deeds in the form of drama or micro video, take the initiative to shoulder the mission of young people, practice the oath of being powerful and contributing their due strength to promote the prosperity of the motherland.
